## Profile

I am a 25-year-old passionate multimedia design student, based in Copenhagen, with a strong interest in code, digital design, and user experiences.

After completing my education as a multimedia designer, I plan to pursue a professional bachelor's degree in web development (August 2025 to December 2026).

I am curious, a quick learner, and able to juggle multiple tasks at once. My strong social skills allow me to easily adapt to dynamic work environments. My ability to take responsibility, combined with my adaptability, makes me a reliable, engaged, and trustworthy employee.

I am interested in a student job where I can contribute solutions to tasks and challenges while also developing my professional skills and experience.
